

Full feature list

Everything in the product today — for doctors, staff, and patients. Patients book a serial and pay at the chamber. We set you up over WhatsApp (no self-signup).

For patients (public website)

Branded chamber page	Doctor/clinic site with photo, about, conditions, FAQs, testimonials, and a clear Book button
Online serial booking	Pick location (if multi-chamber), day, and session; see seats left / Full / Closed
Pay at chamber	Book online; visit fee stays at the desk — no online payment for the consult
Digital serial ticket	Place in line, share/copy, WhatsApp, Print / Save as PDF; map link when set
Household picker	Known phone shows masked initials — patient picks who the visit is for
Patient portal	Enter phone → find recent tickets (not a medical file)
EN / BN language	Book, ticket, and portal system strings in English or Bangla
Walk-ins welcome	Staff can add walk-ins; online booking does not ban walk-ins
PWA install	Optional “add to home screen” for the chamber site

Chamber day — live queue & waiting room

Live Queue Control	Start session → Call → Arrived → Complete; walk-ins; skip / Call now out of turn
Session actions	Mark late, pause/resume, cancel session, finish/end — with patient notices where set
Outdoor waiting-room screen	TV/tablet shows now serving + next
Call announce	Chime, spoken “Calling number...”, or both — English or ■■■■■■
Wait-time ETA	Schedule guess / live average / live steady (branding settings)
Daily roster	Today's list, searchable; staff walk-ins and optional prescription entry
Doctor late SMS/WhatsApp	Notify waiting patients when the doctor is running late

Consult, records & prescriptions

Consult Screen	Auto-updates when a patient is in chamber — history, notes, prescription
Patient records	Name, phone, age/DOB, sex, allergies/conditions/medicines; visit history for staff/doctor
Visit notes	Diagnosis (coded or free text), advice, tests advised, reports seen, follow-up
Voice note + paper photo	Doctor can speak a brief note or photograph a paper slip (private storage)
Digital prescriptions	Medicine picker with dose/frequency/duration; print with doctor credentials
Patient prescription link	Short expiring link (/p/...) — medicines only, no diagnosis — SMS and/or WhatsApp
Same as last visit	Reuse prior medicines/follow-up when appropriate
My medicines	Doctor personal defaults and hide list — shared catalogue stays untouched
Staff type paper Rx	Optional per doctor: staff enter medicines + photo after consult (no diagnosis access)
End-of-session catch-up	Banner for completed patients still missing notes

Schedules, locations & ops	
Schedules & sessions	Days, times, seat caps per chamber/doctor
Multi-chamber	Solo: up to 5 locations · Clinic: unlimited
Vacation / holiday blocks	Block a date; auto-cancel open serials; one-tap WhatsApp notify list
Operational reports	Day / week / month chamber KPIs
Branding & website editor	Logo, colors, fonts, contact, WhatsApp, call audio; page sections
SMS credit wallet	Prepaid confirmations (~\$0.50); booking still works if wallet is empty
Notify preferences	Per doctor: booking confirm, late, cancellation, prescription — SMS and/or WhatsApp
Staff roles	Admin · Doctor · Staff — queue, content, and clinical access split
Custom domain	Optional own domain (e.g. drkarim.com) at root paths
Bangla homepage	Paid add-on when Super Admin enables it

Clinic plan extras (beyond Solo)	
Multiple doctors	Associates in one system; each doctor’s clinical notes stay private
Unlimited chambers	No 5-location Solo cap
Lab tests in booking	Catalogue + collection slots; patient can add labs to the same visit

Solo — one doctor, up to 5 chambers	Clinic — multi-doctor + labs
\$15,000 setup · \$3,000 / month SMS credits extra · WhatsApp ticket share free · Done-with-you setup	\$75,000 setup · \$7,500 / month Same patient tools, scaled · SMS credits extra · Done-with-you setup

Not included (on purpose for now): online visit payment · full hospital EMR/HIS · self-serve signup. Prices from config/marketing.php · regenerate with docs/slides/build-full-feature-list.py
