

What you get

For one doctor — up to 5 chambers. Built for Bangladesh chamber practice. Patients book a serial on their phone and still pay you at the desk. This is everything included on Solo.

Your patients

Your own webpage	Your name, photo, chambers, timings, and a clear Book button — looks like a real clinic site
Online serial	Patients pick a day and session on their phone. Seats left are clear. No “what’s my serial?” calls
Pay at the chamber	Same as today — they book online, pay you at the desk. No online visit payment
Digital ticket	Shows their place in line. They can WhatsApp it to family, or Print / Save as PDF
Family on one phone	If the number is known, they pick who the visit is for — each person keeps a separate record
Find my ticket later	Portal: enter phone → see recent bookings (not a medical file)
English or Bangla	Booking, ticket, and portal work in both languages
Walk-ins still OK	Your staff can add walk-ins. Online does not replace the door

Your chamber day

Live queue	Call → patient arrived → complete. Fair order. Walk-ins fit in when you want
Waiting-room screen	TV or tablet shows who is being called — less shouting at the door
Spoken call (optional)	Screen can say “Calling number 12” (or Bangla) with or without a chime
Come-around time	Ticket can show roughly when to arrive — fewer people sitting for hours
You’re running late	One action can notify waiting patients by SMS and/or WhatsApp
Daily list	See who’s booked today. Search by name or phone

Inside the consult

Consult screen	When you call a patient, their past visits appear — last advice, medicines, follow-up
Patient memory	Name, phone, age, allergies, past visits — so returning patients aren’t a blank slate
Visit notes (optional)	Diagnosis, advice, tests, follow-up — only when you want to record them
Voice or paper photo	Speak a short note, or photograph your handwritten slip — typing is not required
Printable prescription	Medicines with dose/frequency; prints with your name and registration
Send Rx to patient	Short link by WhatsApp/SMS — medicines only, no diagnosis on that link
Same as last visit	Reuse last medicines when it makes sense
Staff help (optional)	You can allow staff to type medicines from your paper after the consult — they never see diagnosis

Running your practice	
Up to 5 chambers	Sit at different hospitals on different days — one Solo plan, one system
Your schedule	Set session days, times, and how many seats
Vacation / holiday	Block a day; open serials cancel; message cancelled patients on WhatsApp in one list
Reports	End of day / week / month — how busy you were, without guessing
Edit your site	You or staff update text and photos. We help at setup
SMS confirmations	Optional prepaid credits (~Tk 0.50 each). Booking still works if credits run out
Your team roles	Admin, Doctor, Staff — front desk can run the queue without seeing clinical notes
We set it up with you	WhatsApp onboarding — no self-signup, no coding

READY WHEN YOU ARE

Message us on WhatsApp — we build your page and go live with you.

Patients still pay at the chamber. Walk-ins still welcome. You keep seeing patients; we handle the setup.

Tk 15,000
one-time setup

Tk 3,000 / month
1 doctor · up to 5 chambers

SMS packs are optional and extra. Bangla homepage and custom domain available if you want them. No Clinic / multi-doctor / lab features on this sheet — ask us if you grow into a multi-doctor practice.
